Innovation Through Experience

Raritan manufactures equipment for pleasure boats throughout the world. Products include marine toilets, waste treatment systems, icemakers and water heaters. Committed to the environment and preserving sea life, Raritan designs products to help maintain an environmental balance and ensure the quality of marine waters. In addition, the company has achieved ISO 9001 certification for quality.

Marine Products for Power & Sail
Established 1958

Benefits

- Uncompromising quality for the most demanding boaters
- Economical electric macerating marine toilet
- Simple and flexible installation for mounting above or below waterline
- Bowl can be rotated 90° for mounting into confined spaces and retrofit mounting
- Heavy-duty marine push-button switch included with all models
- Sea water models include an in-line strainer
- Pressurized freshwater models include vacuum breaker
- Fits 1½" (38mm) or 1" (25mm) discharge line with no adapters
- Easy to clean and maintain
- Can be run dry without damaging the pump
- Low power consumption and quieter operation for on-board pressurized freshwater models
- Can be used with on-board treatment systems (such as the Lectra/San®) and/or holding tanks
- Each unit is assembled by hand, individually tested and backed by Raritan’s one-year Limited Warranty and legendary technical support team

Options

- Available in raw water or on-board pressurized freshwater models
- Operates on 12, 24, 32V DC or 120/240V AC
- Ninety degree 1½" (38mm) discharge fitting available

Raritan manufactures equipment for pleasure boats throughout the world. Products include marine toilets, waste treatment systems, icemakers and water heaters.

SeaEra

A quality inexpensive electric marine toilet that meets boaters’ demand for a small footprint.
The SeaEra is an economical electric macerating toilet that fits into confined spaces. This toilet was designed to meet the needs of boaters. Engineering has developed a new built-in discharge fitting that can accept either 1½" (38mm) or 1" (25mm) discharge lines without the need for an adapter. The SeaEra's discharge pump can handle a vented loop with a maximum height of five feet (1.52m) and utilizes a full-sized jokervalve to help avoid clogging.

The inlet pump can lift water from four feet (1.22m) below the toilet and can be run dry without damaging the pump. To simplify a new installation or a retrofit, water can be routed from either side of the inlet pump using interchangeable ¾" (19mm) hose barb fittings (two straight and one 90°), which are included.
