ATLANTES FREEDOM™ TOILET

VORTEX-VAC™

Installation and Maintenance Instructions

MODEL AV

THE FOLLOWING ARE CAUTIONARY STATEMENTS THAT MUST BE READ AND FOLLOWED DURING BOTH INSTALLATION AND OPERATION.

WARNING: Raritan Engineering Company, Inc. recommends that a qualified person or electrician install this product. Equipment damage, injury to personnel or death could result from improper installation. Raritan Engineering Company, Inc. accepts no responsibility or liability for damage to equipment, injury or death to personnel that may result from improper installation or operation of this product.

WARNING: HAZARD OF SHOCK OR FIRE

Always use recommended fuse, circuit breaker and wire size.

Motors used with this product are “Ignition Protected”. They are not however, explosion-proof as defined in 46CFR 110.15-65(e), Subchapter J-Electrical Engineering.

DO NOT run continuously for more than 30 seconds.

Description:

Atlantes Freedom Vortex-Vac toilet: available in 12V or 24V DC, household and elongated size bowl in White and Almond (bone). Fresh water models utilize onboard pressurized freshwater and sea water models utilize a remote pump installed between raw water source and bowl. SeaFresh model allows switching between fresh and raw water source.

Three different control options are available:

1. **Flush Handle Control**: provides momentary operation of flush water and discharge.

2. **Smart Toilet Control**: provides timed operation and independent control of flush water and discharge with handle or wall switch.

3. **Multifunction Momentary Control**: provides momentary operation and independent momentary control of flush water and discharge.

Model and Serial#: 

Pressurized Freshwater Model

Sea Water Model (Remote Pump)
IMPORTANT SAFETY INSTRUCTIONS:

WARNING: HAZARD OF FLOODING - Always shut off seacock(s) before leaving the boat unattended. Double clamp all below waterline hose fittings and check frequently for integrity.

Toilets mounted at or below the waterline must have a vented loop installed in the discharge line. The top of the vented loop must be a minimum of 4” (10cm) above the waterline at the boat’s greatest angle of heel (see vented loop manufacturer’s instructions).

Sea Water Models must also have a vented loop installed between the intake pump and the toilet bowl. Double clamp all below waterline connections.

WARNING:
Young children should NOT be left unsupervised around toilet. Serious injury or death could occur. Children can drown in water retained in the bowl. Seat and/or lid could close and strike child. Always replace circuit breaker and fuses with same rating. Use Raritan parts to maintain ignition protection requirements.

Recommended Visual Inspection

✓ For leaks at toilet and hose connections
✓ Hose clamps
✓ Condition of hoses
✓ Seacocks
✓ Condition of wires and connections
✓ In-Line Strainer (if you have one)

Operation:
Please see instructions included with control to see how to operate your unit

- No special toilet paper is required.
- Water should appear in the bowl within ten seconds. If not, see troubleshooting section.
- Hard objects or stringy substances (paper towels, feminine hygiene products, filter cigarettes, etc.) must not be thrown into the toilet as they will cause damage.
- Always shut off seacock(s) before leaving the boat unattended.
SYSTEM START-UP

1. Open seacock(s).

NOTE: Pressurized freshwater models; open water source valve.

2. Turn on power to toilet.

3. Flush toilet per Operation Instructions.

4. Check for leaks.

WINTERIZING

- Improper winter lay up is a major cause of marine toilet failure.
- Use only nontoxic antifreeze.
- Flush toilet several times to clear waste from system.
- Dispose of all antifreeze in accordance with local and federal regulations.
- Winterize holding tanks, plumbing, treatment systems (MSD’s), etc. independently following manufacturer’s instructions.

Pressurized Freshwater Models

Parts Required
- 1” (25 mm.) or 1 1/2” (38 mm.) I.D. discharge hose, approximately 3 feet (1 m.) long
- Two buckets
- Nontoxic antifreeze approximately 1 quart (1 liter)

Steps
1. Close discharge seacock (if one exists).
2. Shut off intake water at source.
3. Turn off power to unit.
4. Disconnect and drain intake and discharge hose.
5. Disconnect intake hoses from toilet and place in one of the buckets.
6. Connect short hose to pump’s suction intake and to toilet discharge.
7. Place one empty bucket under hose connected to toilet’s discharge.
8. Place hose connected to intake pump into bucket with antifreeze.
9. Turn on power to unit and flush toilet until antifreeze begins to be discharged from toilet.
10. Disconnect power from toilet.

Intake Pump Models

Parts Required
- 3/4” (19 mm.) I.D. intake hose approximately 3 feet (1 m.) long.
- 1” (25 mm.) or 1 1/2” (38 mm.) I.D. discharge hose approximately 3 feet (1 m.) long.
- Two buckets
- Nontoxic antifreeze approximately 1 quart (1 liter)

Steps
1. Close the intake and discharge seacocks.
2. Turn off power to unit.
3. Disconnect and drain pump suction hose and toilet discharge hose.
4. Connect short hoses to pump’s suction intake and to toilet discharge.
5. Place one empty bucket under hose connected to toilet’s discharge.
6. Pour nontoxic antifreeze in other bucket.
7. Place hose connected to intake pump into bucket with antifreeze.
8. Turn on power to unit and flush toilet until antifreeze begins to be discharged from toilet.
9. Disconnect power from toilet.

RECOMMISSIONING

1. Using the buckets, hoses and approximately one gallon (3.8 liters) of clean fresh water, flush antifreeze out of the toilet (see Winterizing). Dispose of antifreeze in accordance with local and federal regulations.
2. Reconnect the intake and discharge hoses and open both seacocks and water source valve.
3. Check all connections for leaks with several test flushes.
### Plumbing

<table>
<thead>
<tr>
<th>Specification</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum suction of Intake pump (Maximum height above waterline)</td>
<td>4 Ft (1.2m) from Intake Pump.</td>
</tr>
<tr>
<td>Maximum height of discharge vented loop</td>
<td>10 Ft (3 m) from base of toilet</td>
</tr>
<tr>
<td>Pressurized water source minimum requirements</td>
<td>Minimum flow rate 3 gallons (11.3 liters /per minutes, Minimum Pressure 5 PSI(34.5 Kpa))</td>
</tr>
</tbody>
</table>

### NOTES: for Wiring

1. Distances are from source to unit and back to source.
2. Distance from power source to remote intake pump MUST be included when determining total distance. Same wire size MUST be used for lower base and remote intake pump.
3. Recommended conductor wire minimum AWG (mm²) for 3% voltage drop.
4. Recommended conductor sizes are based on 105°C rated insulation. Refer to ABYC Standards for other insulation ratings.
5. For 120/240 VAC units use 12VDC specifications from transformer to unit.

### Water Consumption:

- **Water Saver**: 2 pint*
- **Regular Flush**: 2 quarts

* requires timing adjustment
**SPECIFICATIONS**

### Parts included with all models
1. Toilet bowl assembly
2. Mounting hardware
3. Seat
4. One of the following flush controls:
   a. Flush handle control
   b. Multifunction Momentary Control
   c. Smart Toilet Control
5. User guides and Installation guides with labels

### Additional Parts included with seawater model:
1. Remote pump assy.

### Additional Parts Required
- Two stainless steel mounting bolts or lag screws (minimum 1/4" [6mm]) and washers
- 1” (25 mm.) or 1 1/2” (38 mm.) I.D. discharge hose
- 3/4” (19 mm.) for seawater models or 1/2” (13mm) for freshwater models, reinforced intake hose.
- Hose clamps (two for each connection below waterline)
- Wire
- Terminals
- Fuse/circuit breaker

### Atlantes discharge Maximum recommended 1” or 1 1/2” PVC hose length

</tbody>
</table>

**NOTE:**
1. Each 90 degree Elbow is equal to 4 feet of hose
2. Each Insert coupling is equal to 2 feet of hose
3. Each Y valve is equal to 10 feet of hose

Example: An installation has 50’ of straight run with two elbows and a Y valve, what is maximum height of loop allowed?

**Answer:**
Equivalent hose length = 50’ + 0’(two elbows) + 10’(Y valve) = 60’

From chart horizontal distance of 60’ gives a vertical dist. @ 7’

Hence a maximum of 7’ high loop can be installed.
**MOUNTING**

Mounting surface must be flat and solid.

1. Place toilet where it will be located. **Make sure there is room to route hoses. Make sure seat will open properly.**
2. Using a pencil, mark location of bowl mounting holes.
3. **A.** If hoses will be routed through floor, trace one side of toilet on floor.
   **B.** If hoses will be routed through wall, trace one side of toilet on wall.
4. Remove toilet and mark location for hoses and wiring on deck or wall.
5. Cut necessary holes for hoses and wiring.
6. Drill holes for toilet mounting bolts/screws.

**NOTE:** Use 1/4” [6mm] size bolts/screws. To select proper Screw or Bolt length, measure thickness of deck plus 1 1/8” (29mm).

**TIP:** Do not install until all wiring and plumbing is done. Secure toilet to floor after installation is complete.

**CAUTION:** Do Not over tighten mounting bolts. Damage to the toilet bowl may occur. **Tighten both mounting bolts evenly and slowly.**

**Mounting toilet**

1. Install mounting bushings, bolts.
2. Tighten bolts being careful to not overtighten (Do not exceed 30 inch lb. when tightening)
3. Install caps over mounting bolts.

**Mounting Remote Pump:**

1. Locate remote pump between thru hull fitting and toilet bowl.
2. Locate in an area away from berth to keep noise level down.
3. Use Inline Strainer part# 163000 (optional) to avoid clogs.
4. Secure remote pump to the floor using four bolts through the pump base.
PLUMBING

WARNING: Hazard of Flooding

Toilets mounted at or below the waterline must have a vented loop installed in the discharge line. The top of the vented loop must be a minimum of 4” (10 cm.) above the waterline at the boat's greatest angle of heel (see vented loop manufacturer’s instructions).

Sea Water Models must also have a vented loop installed between the intake pump and the toilet bowl.

Double clamp all below-waterline hose connections.

IMPORTANT

• Fittings and 90° bends should be kept to a minimum.
• In-Line Strainer may be installed on Sea Water Models to prevent clogs.
• Discharging untreated sewage is forbidden in all U.S. waters within the three-mile limit.
• Thru-hull fittings and seacocks must be installed where they are easily accessible.
• Use only quality reinforced hoses such as Raritan SANIFLEX (part# SFH).
• Secure all hoses properly.

Residual Water in the Bowl

The Atlantes Internal Discharge Hose is equipped with an Integral Vent. The Integral Vent is for toilet installations where the discharge flow is downward and residual water after the flush is desired. A flush control that adds water at the end of the flush cycle, such as our Smart Toilet Control (STC), is required for optimal water retention. The toilet must be highest connection in the discharge plumbing when using this vent to retain water in the bowl. The maximum height of water retained is approx. 4” from the bottom of the bowl. IF THE DISCHARGE PLUMBING IS ROUTED UPWARD (such as below water line installations), DO NOT REMOVE THE VENT CAP.

To enable Vent, remove Vent Cap. See Fig. 1
Intake Lines

Pressurized Freshwater Models
Install a shut off valve in intake line before water solenoid valve.
1. Connect hose from shut off valve to inlet port of water solenoid valve at the toilet.
NOTE: To avoid malfunction of water solenoid due to debris in water, installation of Freshwater Strainer (190601) is recommended.

Remote Sea Water Models
Intake pump fittings are interchangeable to allow more flexibility during installation. Inlet ports are located on either side of intake pump. Outlet port (to toilet bowl) is at top of intake pump.
NOTE: To avoid poor pump performance installation of strainer (163000) is recommended
1. Slide fitting clips to open position.
2. Select inlet port to be used.
3. Install appropriate fittings into inlet and outlet ports.
NOTE: The 90° fitting can be rotated 360°.
4. Install the plug fitting into unused inlet port.
IMPORTANT: Be sure not to install plug fitting into outlet port! Damage to pump will occur!
5. Slide fitting clips back to closed position.
6. Connect hose from seacock to inlet port of optional In-Line Strainer if installed.
7. Connect hose from outlet port of In-Line Strainer to inlet port of intake pump.
8. Connect hose from outlet port of intake pump to bowl elbow located on back of toilet bowl.

Connecting Hoses and wiring to toilet
1. Route wire from control per control instruction.
2. Install seat. Install discharge hose support strap between seat nut and the bowl. See Fig. 2
3. Install toilet in place, connect hoses and wire plugs.
Caution: To avoid kinking to not pull on discharge hose, be certain there is no pressure on the discharge line.
**WARNING:** HAZARD OF ELECTRIC SHOCK - Before beginning any work on the toilet, be sure that all power to the unit has been turned off.

**WARNING:** HAZARD OF FLOODING - Make sure seacocks are in the CLOSED or OFF position before working on toilet.

**NOTE:** The following information reflects the most probable causes and solutions to problems although not every possible cause and solution is provided.

Any questions regarding servicing or operation of the Marine Elegance should be directed to our Technical Support Department in Millville, NJ or Ft. Lauderdale, FL. Please have model and serial number available before calling.

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>POSSIBLE CAUSE</th>
<th>SOLUTION</th>
</tr>
</thead>
</table>
| 1. Poor pumpout, especially solids. | 1A. Clogged discharge line.  
1B. Plumbing restrictions, bends and ells.  
1C. Clogged vents.  
1D. Mineral buildup in hoses and fittings.  
1E. Low voltage. | 1A. Be sure discharge seacock is open. Clear line, remove clog.  
1B. Replumb to eliminate bends and ells.  
1C. Clean holding tank vent and vented loop vents.  
1D. Clean or replace affected parts. Replace hose if needed.  
1E. Check voltage at toilet while toilet is running. If less than nominal voltage of toilet (12 or 24), check condition of batteries and wire sizes. Check terminals and wire connections for corrosion (heat at terminals and junctions indicates a bad or corroded connection). |
| 2. Poor water flow, especially at front of bowl (or no water flow). | 2A. Toilet not level.  
2B. Restriction in intake line.  
2C. Pump sucking air.  
2D. Low voltage.  
2E. Clogged strainer. | 2A. Raise rear of toilet; check with level.  
2B. Be sure seacock is open. Clear line, remove clog.  
2C. Check all connections from intake thru-hull to intake pump to be sure no air leaks are present.  
2D. See 1E, above.  
2E. Remove or Clear debris from strainer. |
| 3. Foul odors from toilet area. | 3A. “Marine life” lodged in rim of bowl.  
3B. Permeated discharge hose.  
3C. Sewage remaining in discharge line. | 3A. Remove and flush bowl with pressure hose to remove all material. Install strainer in intake line to avoid recurrence.  
3B. Replace hose with Raritan sanitation hose (#SH).  
3C. Flush toilet longer; replace hose if permeated; reroute hose making a shorter run if possible. |
| 4. Bowl fills while underway. | 4A. Pressure buildup at seacocks. | 4A. Close intake, then discharge seacock to determine which is causing problem. If discharge, be sure the vent or vented loop is clean. If intake, there is too much pressure on seacock; contact Raritan Technical Support. |
| 5. Water leaking from under unit. | 5A. Leaking Bowl Throat adapter.  
5B. Leak at shaft seal.  
5C. Leak from bowl spud. | 5A. Tighten adapter clamps.  
5B. Check seal and motor shaft.  
5C. Check and reseat bowl grommet |

---

**Tip for Removing Intake Pump**

Set screw must be loosened with 1/8” hex key before removing the intake pump from motor.

LIMITED WARRANTY

Raritan Engineering Company warrants to the original purchaser that this product is free of defects in materials or workmanship for a period of one year from the product’s date of purchase. Should this product prove defective by reason of improper workmanship and/or materials within the warranty period, Raritan shall, at its sole option, repair or replace the product.

1. TO OBTAIN WARRANTY SERVICE, Consumer must deliver the product prepaid, together with a detailed description of the problem, to Raritan at 530 Orange St., Millville, N.J. 08332, or 3101 SW 2nd Ave. Ft. Lauderdale, FL 33315. When requesting warranty service, purchaser must present a sales slip or other document which establishes proof of purchase. THE RETURN OF THE OWNER REGISTRATION CARD IS NOT A CONDITION PRECEDENT OF WARRANTY COVERAGE. However, please complete and return the owner Registration Card so that Raritan can contact you should a question of safety arise which could affect you.

2. THIS WARRANTY DOES NOT COVER defects caused by modifications, alterations, repairs or service of this product by anyone other than Raritan; defects in materials or workmanship supplied by others in the process of installation of this product; defects caused by installation of this product other than in accordance with the manufacturer’s recommended installation instructions or standard industry procedures; physical abuse to, or misuse of, this product. This warranty also does not cover damages to equipment caused by fire, flood, external water, excessive corrosion or Act of God.

3. ANY EXPRESS WARRANTY NOT PROVIDED HEREIN, AND ANY REMEDY FOR BREACH OF CONTRACT WHICH BUT FOR THIS PROVISION MIGHT ARISE BY IMPLICATION OR OPERATION OF LAW, IS HEREBY EXCLUDED AND DISCLAIMED. ALL IMPLIED WARRANTIES SUCH AS THOSE OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE, IF APPLICABLE, AS WELL AS ANY IMPLIED WARRANTIES WHICH MIGHT ARISE BY IMPLICATION OF LAW, ARE EXPRESSLY LIMITED TO A TERM OF ONE YEAR. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG A LIMITED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

4. UNDER NO CIRCUMSTANCES SHALL RARITAN BE LIABLE TO PURCHASER OR ANY OTHER PERSONS FOR ANY SPECIAL OR CONSEQUENTIAL DAMAGES, WHETHER ARISING OUT OF BREACH OF WARRANTY, BREACH OF CONTRACT, OR OTHERWISE. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

5. No other person or entity is authorized to make any express warranty, promise or affirmation of fact or to assume any other liability on behalf of Raritan in connection with its products except as specifically set forth in this warranty.

6. This warranty gives you specific legal rights, and you may also have other rights which vary
