

# Maintenance and Cleaning Products

## K.O. Kills Odors!

Eliminates holding tank odors at their source. K.O. works when nothing else will!

- ⚓ Odor-killing bacteria digest liquids, solid waste, and paper.
- ⚓ It does not require adding "tissue digesters" or other "boosters" to be effective.
- ⚓ Safe in any waste tank system.
- ⚓ A small amount of K.O. can easily keep a boat odor-free between pump-outs.
- ⚓ A safe, non-chemical, and non-polluting product.

Part # 1PKO32—32 oz. with squirt cap

Part # 1PKOGAL—1 gallon

## C.P.

**Cleans Potties—C.P. is Like no Other Toilet Bowl Cleaner!**

The first bioactive marine toilet cleaner that eliminates odors cleans stains and keeps your system fresh—without harmful chemicals while keeping the holding tank bioactive.

- ⚓ **Cleans and deodorizes in one step**—A specialized bioactive formula eliminates stains, grime, and odors without harsh chemicals.
- ⚓ **Protects your marine toilet system**—Safe for all parts, preventing rubber deterioration caused by chemical cleaners.
- ⚓ **Safe for the entire sanitation system**—Works in sinks, showers, basins, and sumps without harming seals or plumbing.
- ⚓ **Eliminates the need for bleach or toxic chemicals**—A powerful, natural alternative that won't damage your system or the environment.
- ⚓ **Reduces foul odors in stagnant water**—Adding C.P. to drains before leaving the boat helps prevent musty smells.
- ⚓ **Enhances holding tank efficiency**—Maintains the bioactive environment essential for odor control and waste breakdown.

Part # 1PCP32—32 oz. with squirt cap

The combination of K.O. and C.P. creates a truly odor-free sanitation system. K.O. eliminates odors at the source by using bioactive bacteria to break down waste, while C.P. ensures a sparkling clean toilet bowl without harsh chemicals.

Many boaters unknowingly disrupt their odor control by cleaning with chemical-based products that kill the beneficial bacteria in K.O. With C.P., you never have to worry—it cleans effectively while preserving K.O.'s odor-fighting power. K.O. and C.P. are perfect for the most efficient and eco-friendly marine sanitation system!

Raritan products are chosen by powerboat, sailboat, houseboat and RV owners and manufacturers the world over for their dependability, environmental responsibility, simplicity of installation, operation and maintenance. The product line includes house-hold style toilets, marine toilets, marine sanitation devices and systems, cleaning products, icemakers, water heaters and rudder angle indicators.

# K.O. Kills Odors!

## C.P. Cleans Potties!

### K.O. KILLS ODORS!

#### K.O. is Not a Chemical Product

K.O. utilizes live, odor-killing bacteria that digest liquids, solid waste, and paper, emulsifying them, so there's no need to add "tissue digesters" or other "boosters" to your system. The bacteria in K.O. neutralize the odor-causing elements in waste, effectively converting the contents of your holding tank to an odor-free product.

#### K.O. Is More Effective Than Any Chemical or Enzyme Product

Chemicals only mask the odor temporarily. Although they kill odor-causing bacteria, chemicals also kill other bacteria that suppress odor. Chemicals can cause the odor problems you're trying to solve!

Enzymes stimulate the breakdown of waste already in the tank but are ineffective against odor and diluted by new waste as it's added. You need only four ounces of K.O. per 25-gallon tank capacity. There is seldom any need to add K.O. between pump-outs, nor do you need to pump out until the tank is full, making K.O. less expensive to use than lower-priced products. Unlike chemicals, the discharge from tanks treated with K.O. is welcome in on-shore sewer and septic tank systems.

### C.P. CLEANS POTTIES!

#### C.P. is Like No Other Toilet Bowl Cleaner

It's the first bowl cleaner to combine a specialized strain of bacteria with 100% biodegradable cleaning agents designed to make the bowl shine like never before and keep the entire system odor-free while maintaining the bioactive environment essential to odor control in your holding tank.

#### C.P. Destroys Odors on Contact as it Cleans

Just squirt a little C.P. under the rim of the toilet bowl. Stains, soil, and odor – even the worst raw water odors from the intake line – disappear, usually without brushing. C.P. eliminates the need to use bleach and other toxic chemicals to sanitize your toilet bowl. Use C.P. to clean sinks, showers, and basins too! It leaves them sparkling clean and fresh-smelling.

#### C.P. is The Only Bowl Cleaner That Can Be Combined With K.O.

Other toilet bowl cleaners use chemicals. Because C.P. is a bioactive cleaner with no chemicals, it won't kill the bacteria in K.O.
